

Instructions for working with BigBlueButton

1 step: Click on the link:

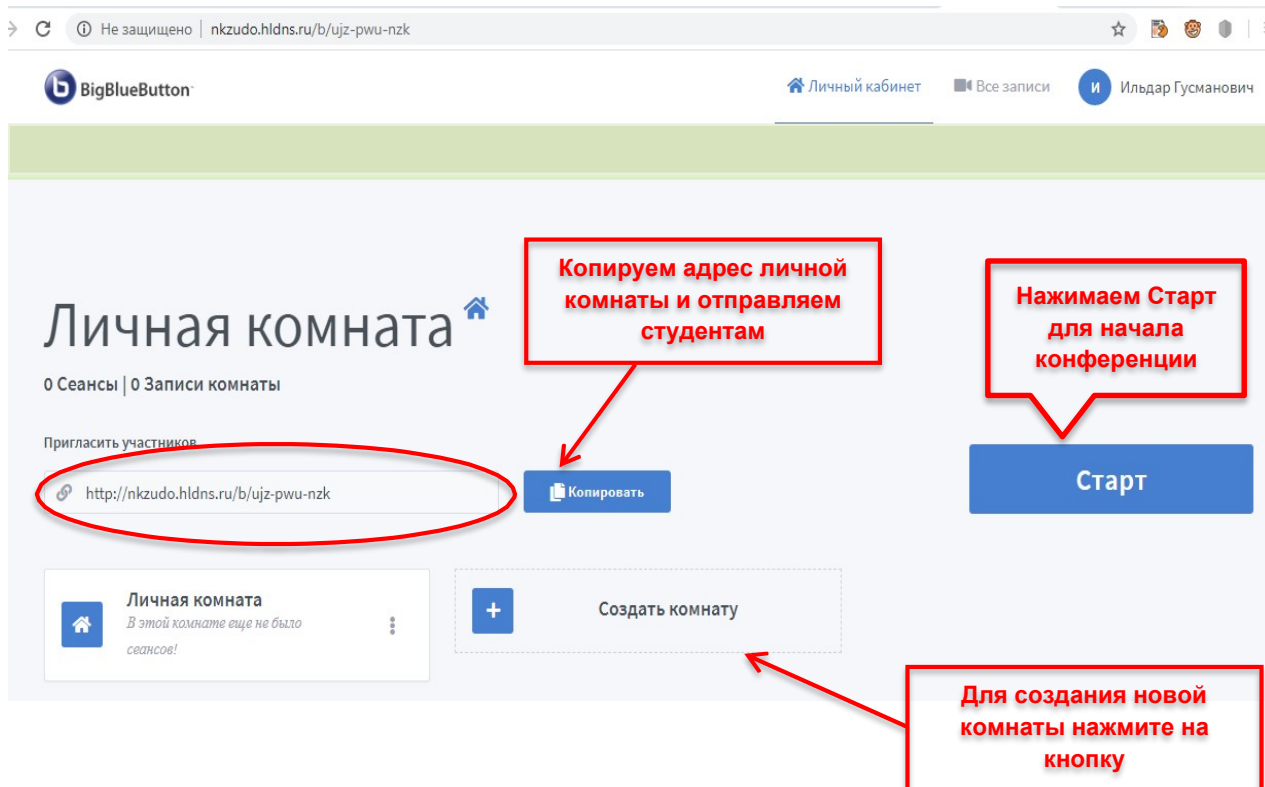

<https://bigbluebutton.nkzu.kz/b>

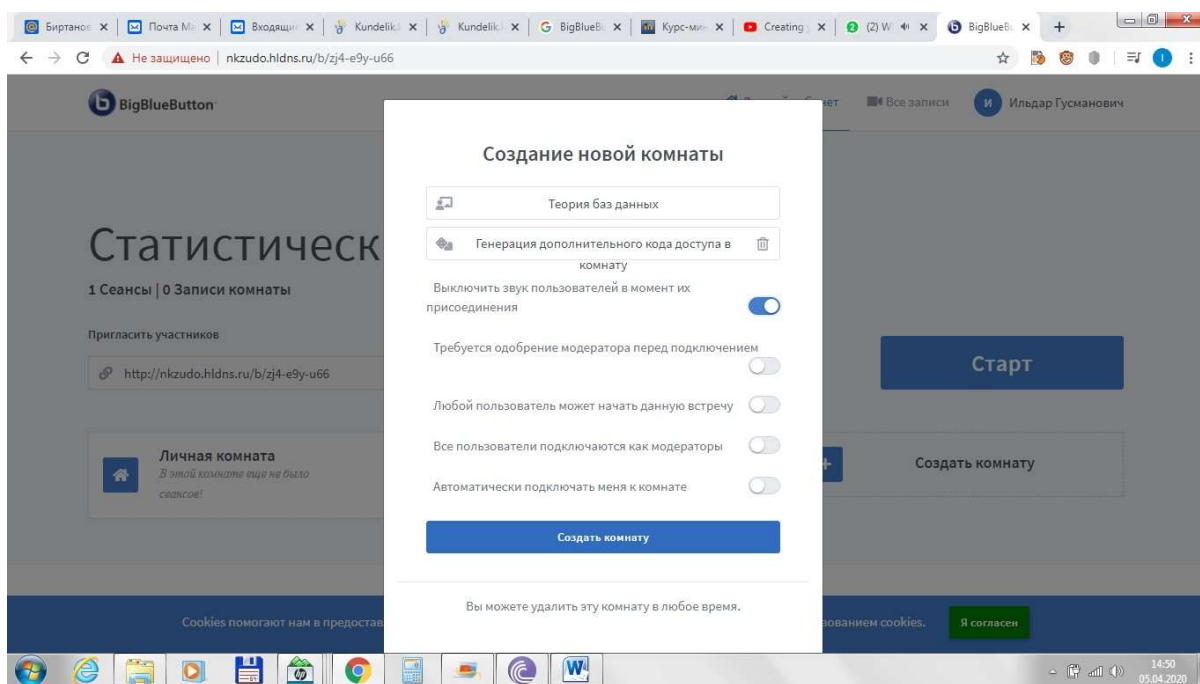

2 step: Fill in the appropriate fields:

A registration form titled 'Создать аккаунт' (Create account). It contains four input fields: 'Полное имя' (Full name) with the value 'Копнова Оксана Леонидовна', 'Электронная почта' (Email) with the value 'oksanakopnova@gmail.com', 'Пароль' (Password) with masked characters, and 'Подтверждение пароля' (Confirm password) with masked characters. At the bottom of the form is a large blue button labeled 'Зарегистрироваться' (Register).

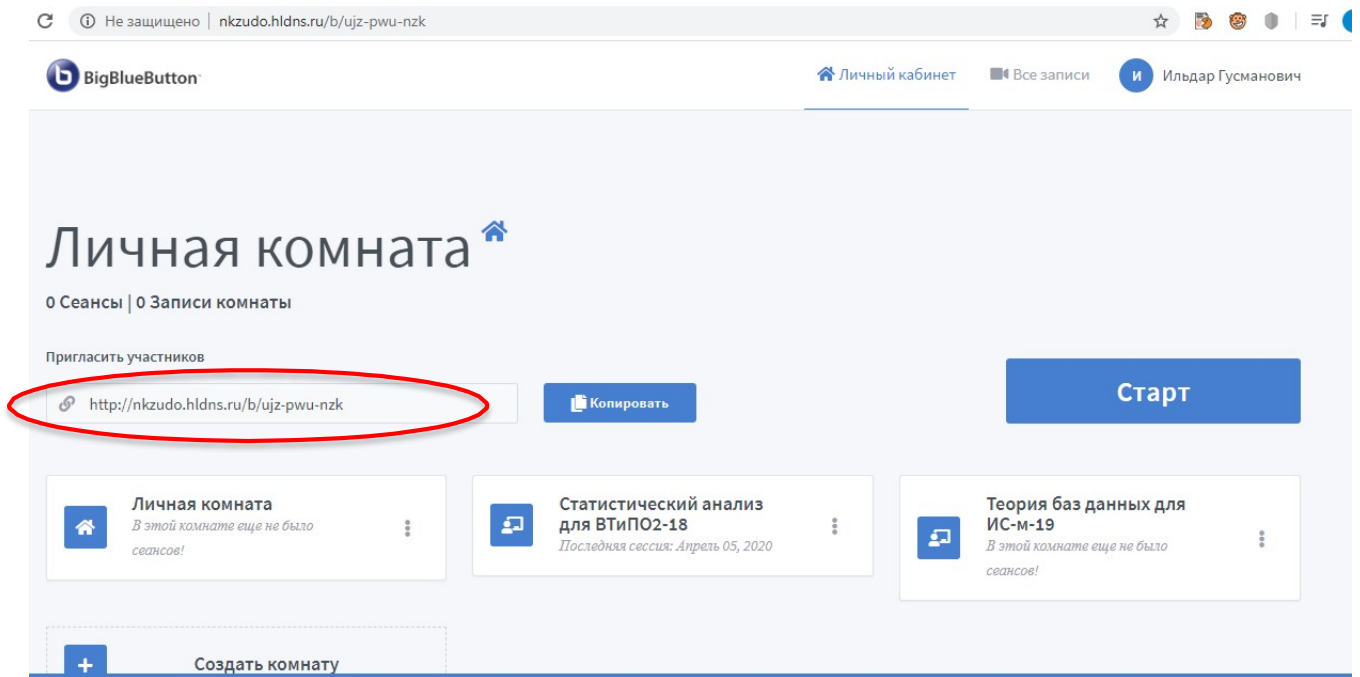

3 Step. After registration, a private room appears. You can create multiple rooms. The addresses of each room are fixed and do not change.

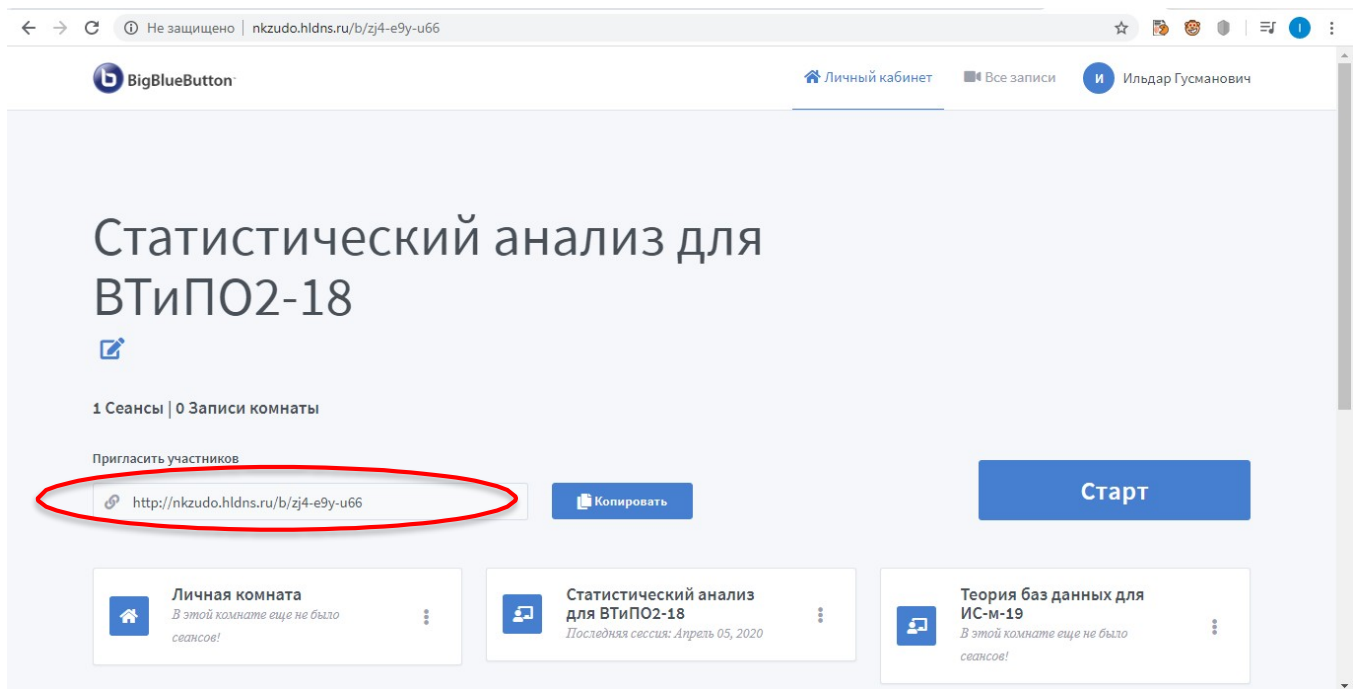

To create a new room, you need to fill out a form, for example:

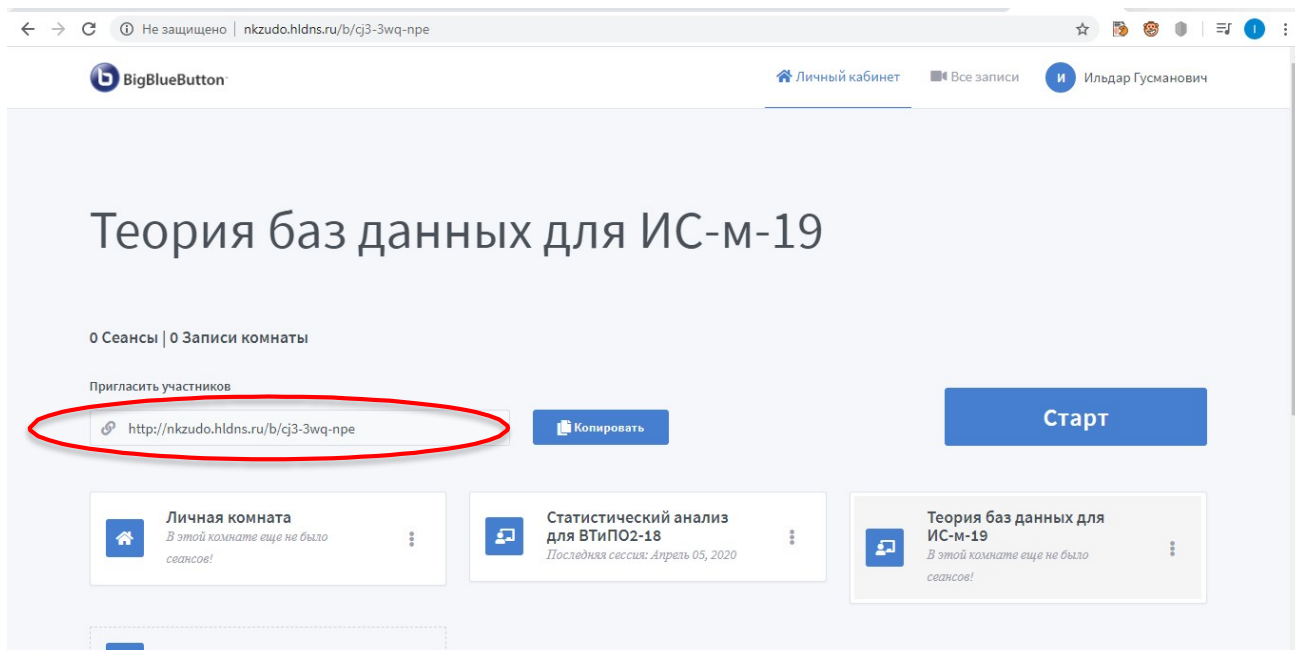

Examples of created rooms, each room will have its own connection link, be careful:

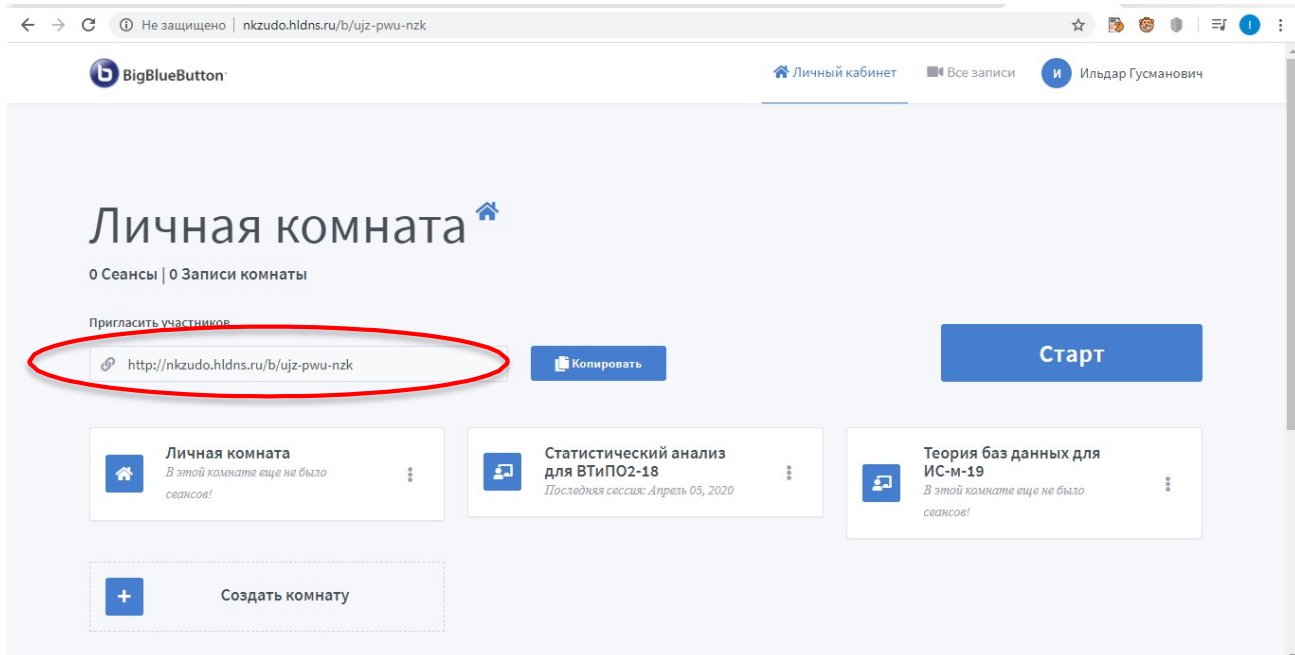

For the "Statistical analysis" room, its own link for connecting students:

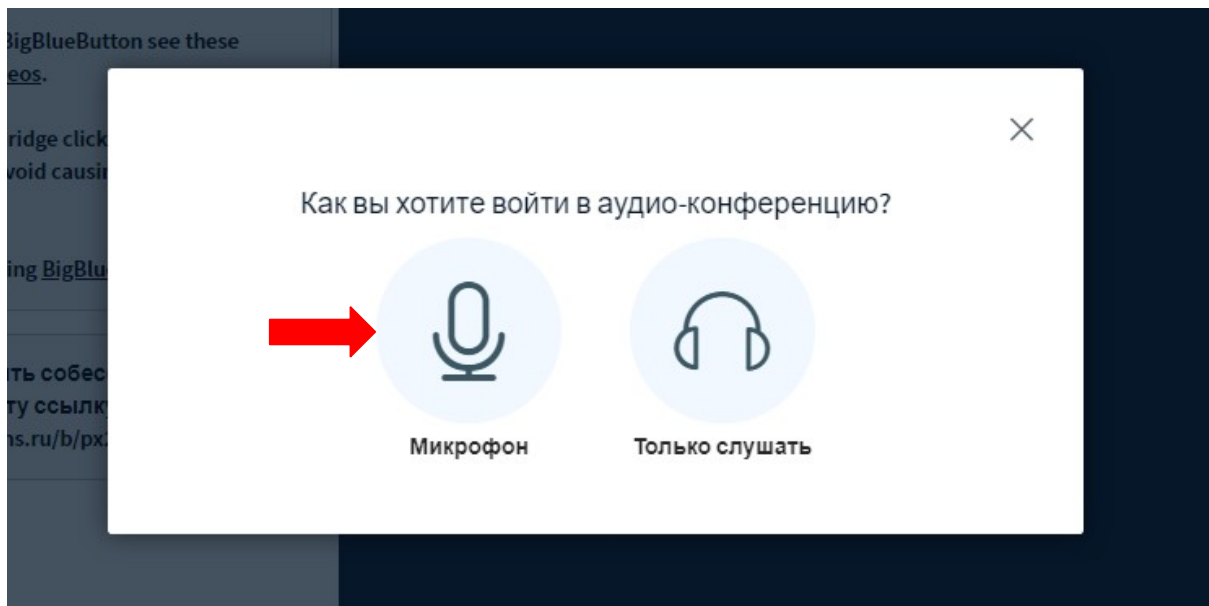

For the "Database theory" room - another link:

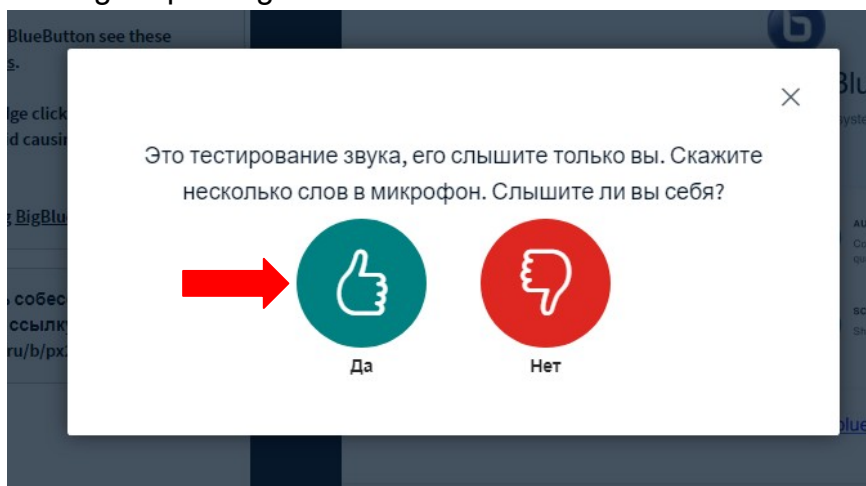

If you don't want to create rooms, you can use one permanent "Personal room" for web conferences. here the link will be permanent and will not change:

After clicking the **START** button, the conference setup begins: Select a microphone so that you can broadcast:

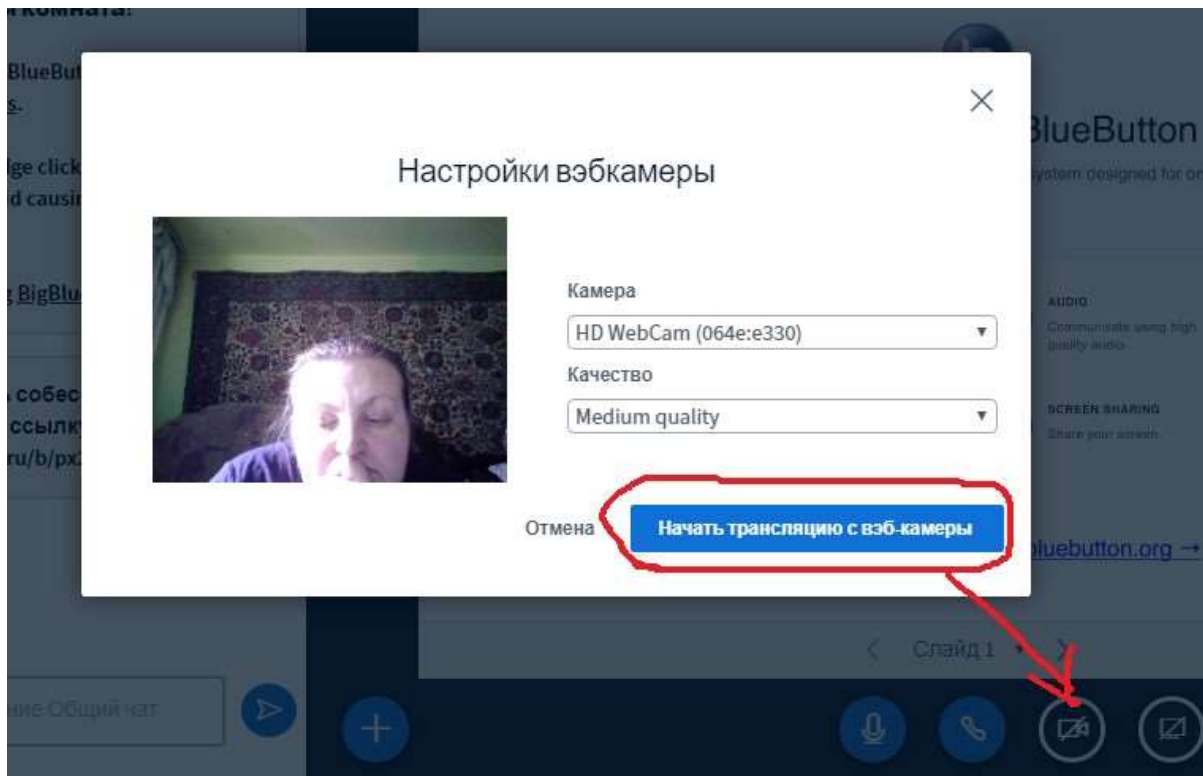

Audio is being tested. If you can hear yourself, it means everything is fine - press the finger up and go into conference mode

When you first start, a window may appear in the upper-right corner to allow you to use the microphone. Click the **ALLOW** button.

To start broadcasting click on the button with the video camera image in the lower corner of the screen

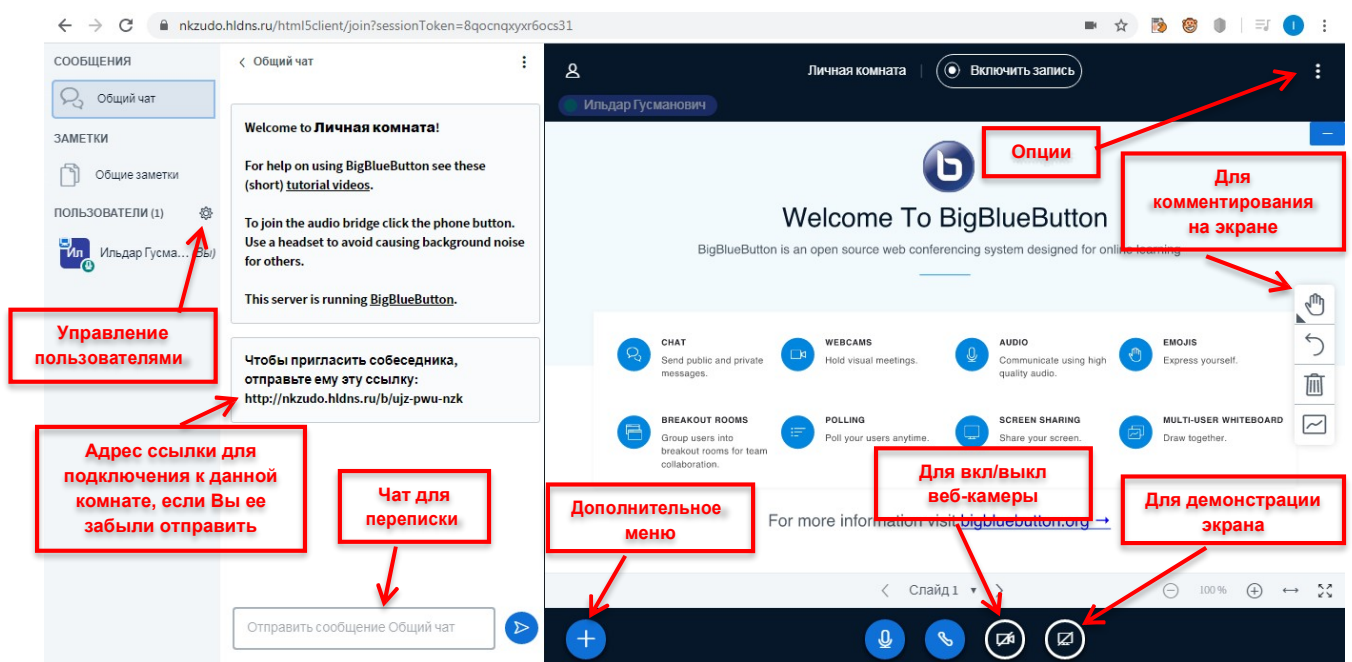

The conference desktop looks like this:

The right field displays a list of conference visitors, followed by a chat where you can write questions or tasks.

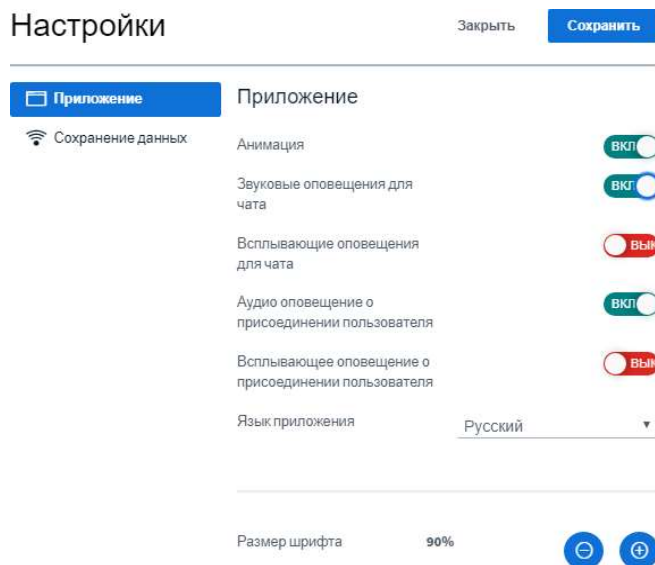

If you need to upload a presentation, conduct a survey, or share a video from other sources, click the “+”

If you need to show your work screen, click on the monitor image at the bottom of the screen.

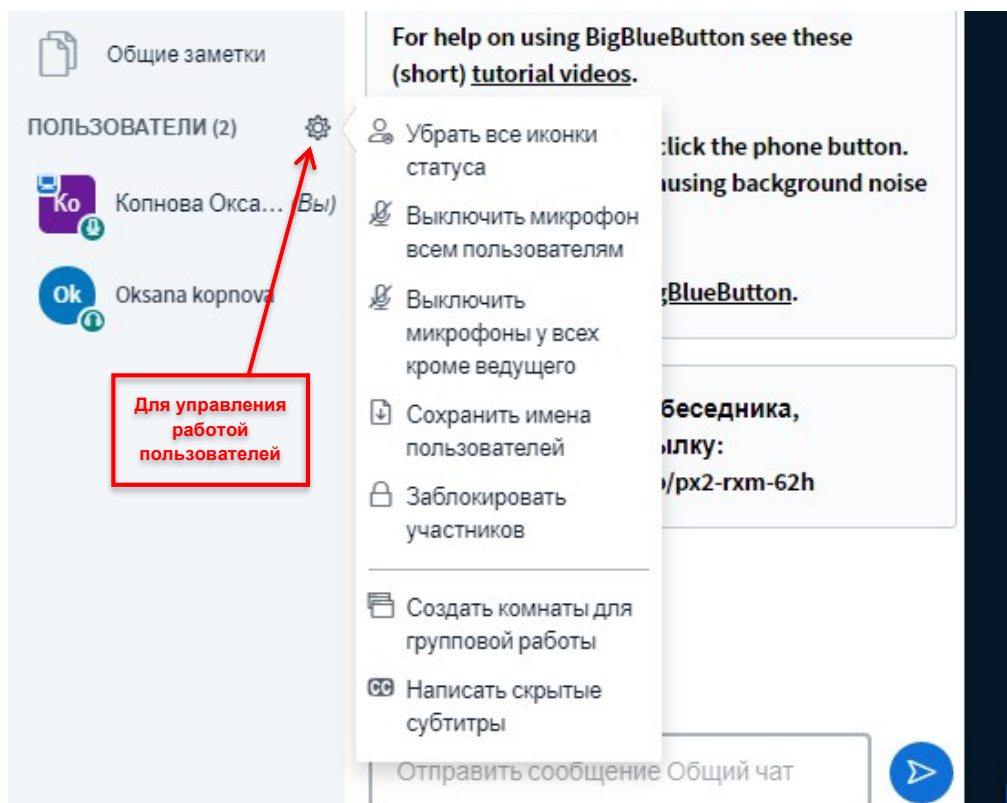

In the “Options” menu, you can configure the conference sound effects.

We recommend disabling audio alerts for chat and audio alerts when a new user arrives:

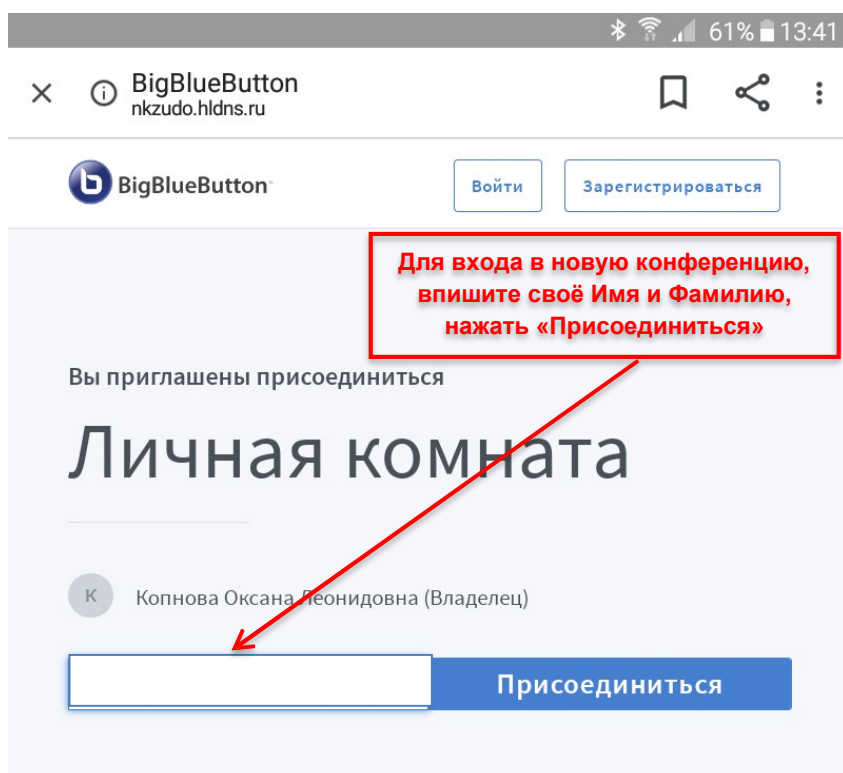

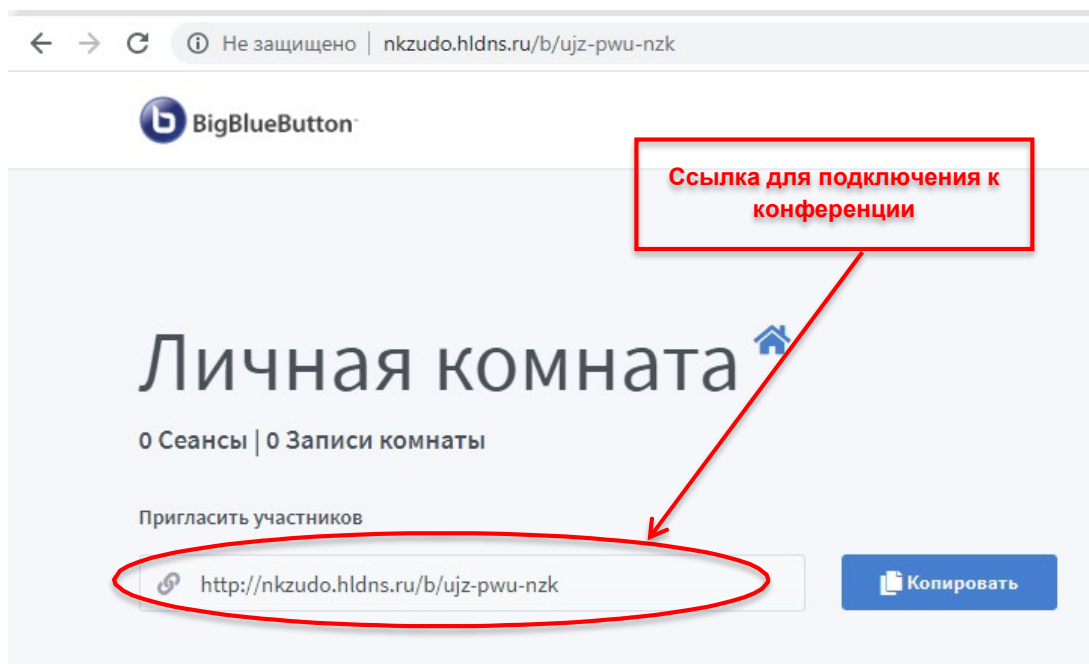

By clicking on the gear image you can manage the work of users within the conference:

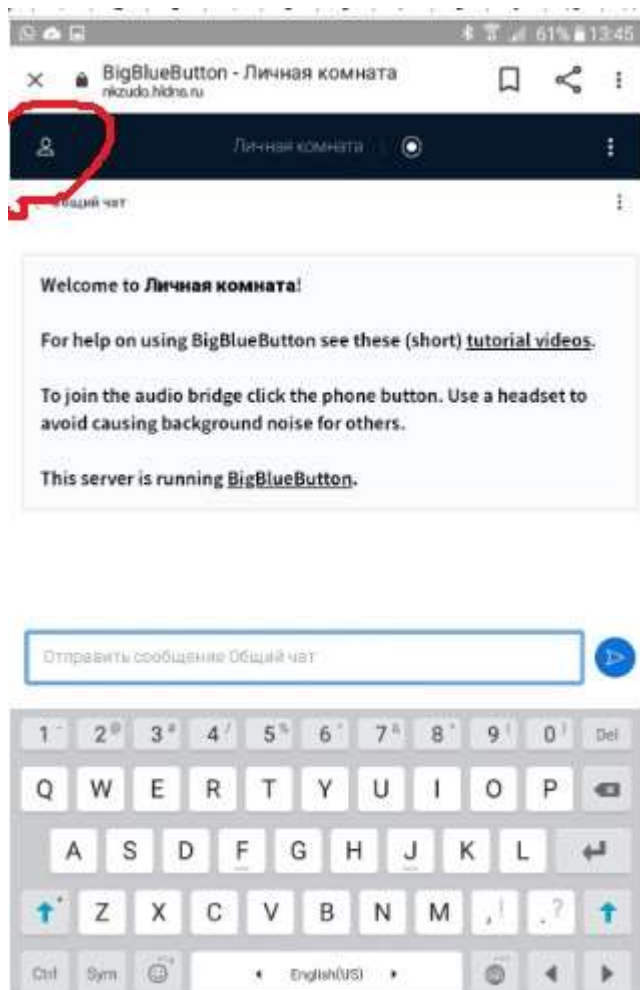

For users of conference participants (students).

Conference participants log in by clicking on the provided link.

For users working with a cell phone or tablet, the transition between chat and video broadcasting is performed using the image of a person in the upper-right corner:

Conference from your smartphone:

18:43

60
